		THIS IS UNEVALUATED INFORMATION	SUPP. TO REPORT NO.
1	. The	ere are uranium ore deposits in Bulgaria at:	
1		Enine (six kilometers north of Kazenlük) Zlatograd, or vicinity. This is reported to be	s very rich deposit
	b.	Enine (six kilometers north of Kazenlük) Zistograd, or vicinity. This is reported to be and its development has already begun.	looklassa Waxaa da
	b. Oth	Enine (six kilometers north of Kazenlük) Zlatograd, or vicinity. This is reported to be	looklassa Waxaa da
2.	b. Oth	Enina (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Bucheve and at Bucheve posits, plus the new ones named above make Bulen	sehkovo Manastir. These ria one of the important
2.	b. Oth	Enins (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Bosits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case	sehkovo Manastir. These ria one of the important
2.	b. Oth	Enina (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Boosits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case	sehkovo Manastir. These ria one of the important es, in Soviet hands.
2.	b. Oth	Enins (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Bosits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case	sehkovo Manastir. These ria one of the important es, in Soviet hands.
2.	b. Oth	Enina (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Boosits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case - end -	sehkovo Manastir. These ria one of the important es, in Soviet hands.
2.	b. Oth	Enins (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Busits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case - end -	sehkovo Manastir. These ria one of the important es, in Soviet hands.
2.	b. Oth	Enins (six kilometers north of Kazanlük) Zlatograd, or vicinity. This is reported to be and its development has already begun. mer deposits already known are at Bukheve and at Busits, plus the new ones named above, make Bulgaurces of uranium ore for the USSR. atrol and technical direction remain, in all case - end -	sehkovo Manastir. These ria one of the important es, in Soviet hands.
